

Welcome:

Congratulations on your purchase of ZEN mobile device.

ZEN, your best mobile communication partner. Your mobile provides many functions that are practical for daily use, such as a calendar, clock, an alarm clock, and messaging functions.

PS: Where any discrepancy arises between the practical function and the manual book, the index and practical function shall prevail. The Company reserves the right of revising the manual book without notice.

ZEN M25

Contents

1. For your safety

Read these simple guidelines. Not following them may be dangerous or illegal.

SWITCH OFF IN HOSPITALS

Follow any restrictions. Switch the device off near medical equipment. Do not use the device where blasting is in progress. Follow any restrictions.

Please keep this cell phone away from children, as they could mistake it for a toy, and hurt themselves with it.

Don't try to modify the phone except by the professional.

Warning!

Only use the authorized spare parts, otherwise it may damage the phone and the warranty will not work. And it may be dangerous.

SWITCH OFF WHEN REFUELING

Don't use the phone at a refueling point. Don't use near fuel or chemicals.

SIM CARD AND T-FLASH CARD ARE PORTABLE

Pay attention to these small things to avoid children eating them.

Notice: The T-Flash Card can be used as a Memory Disk, the USB cable is necessary.

BATTERY

Please do not destroy or damage the battery, it can be dangerous and cause fire.

Please do not throw battery in fire, it will be dangerous

When battery cannot be used, put it in the special container.

Do not open the Battery.

If the battery or the charger is broken or old, please stop using them.

USE QUALITY EQUIPMENT

Use our authorized equipment or it will cause dangers

ROAD SAFETY COMES FIRST

Give full attention while driving; Pull off the road or park before using your phone if driving conditions so require.

INTERFERENCE

All wireless devices may be susceptible to cause interference, which could affect performance.

SWITCH OFF IN AIRCRAFT

Wireless devices can cause interference in aircraft. It's not only dangerous but also illegal to use mobile phone in an aircraft.

Warning: Improper using will make warranty expiration.

2. Getting Started

Battery Install Notice

Before you install or change battery, please ensure you already turn off the phone.

Install or change SIM card Notice

1. Before you change SIM card, please make sure you already turn off the phone and dispose battery.
2. Insert the SIM card and make the golden contact area face down and the nick face out.

Charge the battery

1. Before charging the battery, please make sure that the battery is installed properly in the phone.
2. Connect the charger lead to the phone socket, and then connect the charger to the AC socket.
3. If the phone is on when it's charging, charging indicator is displayed on the screen. If the phone is off when it's charging, user can use it while charging. When the battery is fully charged,

the charging indicator on the screen is full and stops twinkling. While using the handset for the first time, please completely discharge and then completely charge the battery. Repeat the process for three times to achieve the full performance of the battery

4. Long period unused or some other reasons may cause low battery pressure, so at the beginning of charging the screen is black and it may take a while before the charging indicator appears.

Warning: When charging, in order to avoid serious damage to phone circuitry, do not remove or dispose the battery.

Backup Phonebook to memory card or Resume Phonebook from memory card.

5.1.6 【Settings】

Setting: Memory Status/Caller groups/Extra numbers/Preferred Storage/Fields/My vCard/Call picture/Caller ringtone/Caller video.

5.2 【Messaging】

5.2.1 【SMS】

The SMS function is a network service. You may need to apply to the network operator first before you can send and receive a short message.

Your cell phone supports the short message sending function. Short messages are sent to network SMS center first and then sent to subscribers. If the subscriber does not turn on the phone or cannot receive messages (storage is full), the network will keep this message temporarily. The keeping period will be determined jointly by the message sending user's setting and the service operator.

By using the SMS, the phone can send and receive long messages. Sending long messages may affect the charge for the messages. For details, please contact your service operator.

If the memory for messages is full, a twinkling icon will be displayed on the screen. Your phone supports dual SIM card so messages in SIM card A and B are separately stored. The reminders for full memory of SIM card A and B will also be given separately. In such case, you need to delete at least one message in the memory of the respective SIM card to receive new message.

Note: When sending messages, your device may display *Message Sent*. This is an indication that the message has been sent by your device to the message centre number programmed into your device. This is not an indication that the message has been received at the intended destination. For more details about messaging services, check with your service provider.

■ **Write message:**

Your device supports the sending of text messages beyond the character limit for a single message.

Longer messages will be sent as a series of two or more messages. Your service provider may charge accordingly.

The number of available characters and the current part number of a multipart message is shown on the top right of the display, for example-- 160/1.

The phone supports sending a long message having over 160 characters (character number restriction for common text messages). If a message has more than 160 characters, the message will be divided into two or more messages and sent.

The following menu option functions by using left key are provided when you are writing a short message:

- **SIM A/B Done:** Enter sending method option and send the message.
- **Use templates:** To use a built-in template.
- **Insert calling card:** To insert a selected contact from the phonebook.
- **Insert Call History:** To insert the recent call history.
